ENVIRONMENTAL POLICY

The company scope of operations is the hire, installation and operation of video, audio visual and sound equipment and the project management of exhibitions, shows and conferences.

It is the policy of the company to encourage the active involvement of persons working for and on behalf of the company in both minimising the adverse effects on the environment and in providing the best environment in which to work. This includes a commitment to maintain a system of continual improvement and prevention of pollution.

- Adhere to and where possible exceed the requirements of all relevant environmental legislation and regulations and other legal, policy and statutory requirements applicable to the company and its environmental aspects.
- Manage the land to the best environmental standards.
- Keep offices, car park and footways clear of litter at all times.
- Undertake a Risk Assessment before new products and procedures are introduced.
- Ensure disposal of waste in safe and environmentally friendly manner.
- Purchase biodegradable and “ozone friendly” cleaning materials and ensure that contractors follow the same practice.
- Encourage suppliers, contractors and customers to increase their environmental friendly practices.
- To continue to monitor, evaluate and its processes and systems in line with the policies, objectives and targets. These systems are designed to meet the international standard ISO 14001.
- This policy statement is available to the public upon request.

ENVIRONMENTAL POLICY

Natural Resources:

The policy aims to prevent pollution by minimising the use of natural resources via:-

- Introducing control systems to improve energy efficiency.
- Adapting the building to reduce heat loss wherever this can be cost effective.
- Introducing low energy lighting.
- Installing devices to reduce the consumption of energy and water.
- Purchasing recycled paper and paper products where practical.
- Reduce, recycle and /or reuse waste where practical.
- Reducing, and if possible, eliminating the use of disposable products.

Implementation:

The company will:-

- Ensure that all persons working for or on behalf of the organisation are asked to consider the environmental implications of their work / operations.
- Promote the Environmental Policy and to give basic awareness training.
- Maintain close co-operation with groups interested in environmental issues.
- Undertake an annual environmental audit and regular inspections.
