

# LED Net

CREATIVE  
TECHNOLOGY

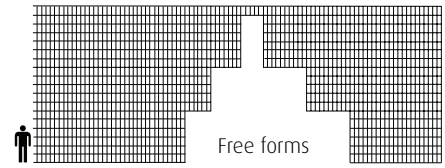

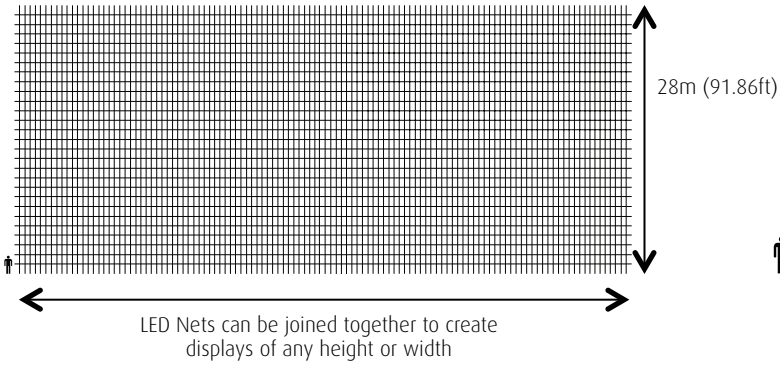

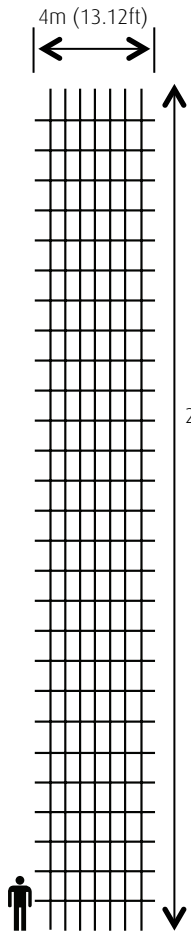

## NEW EXTREMELY LIGHT WEIGHT, FLEXIBLE, LED NET

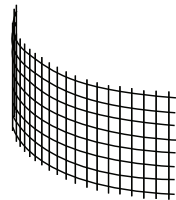

Creative Technology's LED nets are an extremely light weight and low resolution LED curtain system designed to create massive Video Displays in locations with long viewing distances or where a specific low resolution image is required. Developed and owned jointly with Tait Technologies, the LED Net system can be used to create images of up to 12,000 m<sup>2</sup> which is sufficient to cover a typical football field or the side of a substantial building.

Each LED Net section measures 28m x 4m and nets can be simply snapped together to form longer or wider displays. LED Nets can also be overlaid on top of one another with an offset to increase the visual resolution.

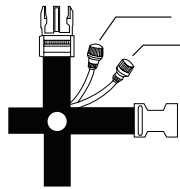

This is a product which requires careful thought and planning both in terms of physical installation and content creation however LED Nets offer a unique opportunity to envelop a building or stadium with dynamic moving imagery on a temporary basis.

LED Nets can be configured horizontally or vertically to create free form shapes and designs

LED Nets can be curved around a building or object

Easy hardware, power and data connection

## Specification

<b>Technology</b>	SMD
<b>Horizontal resolution</b>	1000mm
<b>Vertical resolution</b>	500mm
<b>IP LED (front and back)</b>	65
<b>Length</b>	28m / 91.86ft
<b>Width</b>	4m / 13.12ft
<b>Weight (m<sup>2</sup>)</b>	0.2kg / 0.44lbs
<b>MTBF</b>	100.000h
<b>AC input voltage</b>	100-240 VAC, 60-50Hz
<b>Signals in</b>	Full DVI
